

Press release

Regensdorf / Kaiseraugst, November 6, 2025

Thommen Group acquires stake in LiBaService24 AG – Integrated one-stop service for high-voltage batteries in Switzerland

Thommen Group, Switzerland's leading recycling company, has acquired a stake in LiBaService24 AG, a specialist in the safe handling of high-voltage (HV) batteries from electric vehicles as well as residential and industrial energy storage systems. This partnership establishes a unique, integrated solution in Switzerland for the secure management of used, defective, or critically damaged HV batteries – from recovery to recycling.

With the rapid growth of electromobility and battery-based storage systems, the need for safe and legally compliant handling of HV batteries is increasing significantly. This is where Thommen Group and LiBaService24 AG come together: customers benefit from a comprehensive service chain that covers all key processes, including integrated reverse logistics, emergency and quarantine management, ADR/SDR-compliant transport, diagnostics, repair, and transfer to certified recycling processes. Pouyan Dardashti, CEO of Thommen Group, comments:

"With this partnership, we make the safe handling of high-voltage batteries simple, efficient, and fully compliant – from breakdown to recycling."

LiBaService24 AG operates a nationwide network of qualified partners available 24/7. Their extensive experience in electromobility, industrial energy storage, and hazardous goods handling sets them apart. Combined with Thommen Group's comprehensive recycling infrastructure and nationwide locations, this partnership creates a strong, integrated network featuring standardized processes, clear responsibilities, and the highest safety standards.

Dr. Viktor Haefeli, Chairman of the Board of Directors and CEO of LiBaService24 AG, adds:
"One-stop service: one ticket, one team, one fast and safe, Switzerland-wide solution."

An overview of the complete range of services:

- 24/7 nationwide emergency and quarantine management
- Training, hazardous goods mandates, implementation of 24/7 security concepts
- Transport of HV batteries in compliance with hazardous goods regulations (end of life, prototypes, defective, critically defective)
- Consulting, expert opinions, and safety audits regarding lithium-ion batteries
- Fire tests and certified LiBa protection – and ADR/SDR transport material
- Diagnosis, repair, and maintenance according to manufacturer specifications
- Certified recycling partners and return of secondary raw materials
- Central coordination and complete web-based documentation

An important step towards safer and more sustainable electric mobility

With its stake in LiBaService24 AG, the Thommen Group is further strengthening its pioneering role in the field of sustainable raw material cycles. The new service is designed for car importers, workshops, battery manufacturers and importers, insurance companies, logistics providers, emergency services, and public authorities that rely on a safe and dependable solution for handling high-voltage batteries.
